WOODWORK - Year 10 elective

The year 10 Woodwork program looks at the design process, materials and project work to enhance the student’s knowledge of product design, assembly and the safe use of tools and equipment within the workshop environment. Woodwork is a stepping stone towards the BHSSC Year 11 Certificate II in Building and Construction – carpentry program. It is also recommended for those students intending to pursue studies in Product Design and Technology at VCE level.

Students will be assessed on coursework, practical project and exam.

Duration: One semester at 7 periods per week.

Students will normally undertake one semester of Woodwork and one semester of Technical Drawing.

Major Topics Covered:

Workshop safety
How to select and use woodworking tools correctly
The design process
Suitable methods of joining timber
Finishing techniques

Pre-requisite Subjects

Nil

Fees - In addition to the general materials fee a charge of $50 applies.
